

ESRS Sustainability Report

Service Overview

ESG?
We take care of it.

Your Sustainability Report in accordance with ESRS

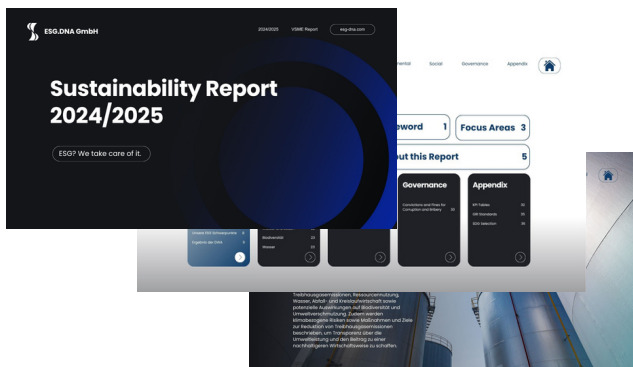

We prepare an audit-ready ESRS sustainability report for you (including double materiality assessment, ESG risk analysis, data collection, and report preparation). Implementation is supported by software and AI with minimal internal effort for data collection, analysis, and CO₂ monitoring, assisted by ESGBot as a specialized ESG AI.

Ihre Vorteile

- + **End-to-End ESG Reporting from one Source**
Analysis, data collection, and report preparation are fully handled
- + **Regulatory Compliance**
Fulfillment of the European Sustainability Reporting Standards (ESRS)
- + **Handling of Complex Requirements**
Clear methodology for ESG data, KPIs, and disclosure requirements
- + **Central ESG Data Base**
Structured ESG data for future reporting

Starboard ESRS Reporting Features

- + **ESRS-Setup**
Definition of reporting boundaries, governance structures, and reporting processes
- + **Double Materiality Assessment**
Identification and evaluation of impacts, risks, and opportunities in accordance with ESRS
- + **ESG Data Management & KPIs**
Collection, structuring, and calculation of all relevant ESG KPIs
- + **CO₂ Accounting & Emissions Management**
Recording and calculation of Scope 1, Scope 2, and optional Scope 3 emissions
- + **ESRS Report Preparation**
Texts, tables, and visualizations in line with ESRS standards

This ensures mandatory reporting is implemented in a structured, efficient, and audit-proof manner.
